

TRADES

IN TRAINING

HALL COUNTY SCHOOLS

Trades in Training is a Work-Based Learning program for students that have completed the Construction or Metal pathways. This program provides real-world experience and advanced educational opportunities within the construction industry.

Trades in Training interns get exposure to the basic business systems involved in the construction industry, including carpentry, electrical, plumbing, HVAC, and more. These internships are a paid opportunity.

For more information on our Trades in Training program, please email tradesintraining@hallco.org
